

For Roofing Contractors who DEMAND the best...

ROOFTOPGUARD II
High Performance Roofing Underlayment

5-PLY CONSTRUCTION:

Individual multi-layered construction results in greater nail sealability, heavier, thicker synthetic allowing easier handling and flatter lay down.

DECKSIDE FRICTION FILM:

The individual deckside layer provides a high tack that secures during installation.

TOPSIDE WALKABILITY:

Individual topside provides all-weather walkability. While grey color allows quicker start times due to burn off.

LONG-TERM BARRIER SOLUTION:

RoofTopGuard II Premium's construction will not decay due to Thermal Cycling, unlike lighter weight synthetics.

FULLY CERTIFIED & TESTED:

RoofTopGuard II Premium is the most fully tested product in the market.
