

CLADIATOR™

Built to Conquer New Challenges

Advancements in Cladding Support Systems.
Design + Performance.

Provider#: 404109480

Course #: CES6421

AIA CES Credit

Credit earned on completion of this course will be reported to **AIA CES** for AIA members.

This course is registered with **AIA CES** for continuing professional education. As such, it does not include content that may be deemed or construed to be an approval or endorsement by the AIA of any material of construction or any method or manner of handling, using, distributing, or dealing in any material or product.

Questions related to specific materials, methods, and services will be addressed at the conclusion of this presentation.

This presentation is protected by U.S. and international copyright laws. Reproduction, distribution, display, and use of the presentation without written permission of the speaker is strictly prohibited.

About this Course

Considerations

- How cladding is attached - **no longer just a question of transferring loads.**
- The **type** of support system used can greatly affect **performance.**
- Over the **last ten years** cladding support systems have **advanced.**
- This course walks through the **various types** of newer cladding support systems - with a **goal to help bring more value to the design process and building occupants**
